

BioBusiness Asia 2009

Company Name	Hai Kang Life Corporation Limited		
Presenter	Albert Cheung Hoi YU	Title	CEO & Chairman
Address	8/F Hang Tung Resources Center, 18 A Kung Ngam Village Road, Shau Kei Wan, Hong Kong.		
Website	www.haikanglife.com		
No. of employee	30	Year of foundation	10
Company Categories	<input type="checkbox"/> Novel Therapeutics <input type="checkbox"/> Genomics <input type="checkbox"/> Pharmaceuticals <input type="checkbox"/> R&D Service <input type="checkbox"/> Medical Devices <input type="checkbox"/> Other <u>Molecular Diagnostics</u>		
Paid-in Capital	HK\$100,000,000.00		
Company Stage	<input type="checkbox"/> Seed <input type="checkbox"/> Start up Expansion <input type="checkbox"/> Mezzanine		
Company Overview	<p>Hai Kang Life Corporation Limited (HKLife) is a Hong Kong-based biotechnology company specialized in R&D and commercialization of molecular diagnostic platforms for veterinary, clinical and food testing.</p>		
Company History	<p>HKLife, formerly known as Hong Kong DNA Chips Limited (HKDNA), was established in 1999. We are strategically positioned at the hub of Asian biotechnology with the most advanced technologies and a team of world-class molecular biologists.</p> <p>The R&D and commercialization of the novel <i>EFADchip</i> technology and our various DNA-related products and services are offered through HKLife and our subsidiaries: DNA-TECH Limited, Angenomics Limited, and The Food Safety Laboratories Limited, with our R&D, testing and production in strict accordance to international standards.</p> <p>We have established relationships with government health and agriculture agencies in various countries throughout the South Pacific region and the Middle East; this enables us to maneuver quickly to assist during emergencies, monitor the climate of the biotechnology industry and keep abreast of changing rules, regulations, needs and trends. We also have a track record of working together with other organizations to develop cost-effective molecular biology solutions to everyday problems [patent applications have been granted or are pending on some of our innovations].</p>		
Main Products/ Service & Niche of Products/ Service	<p>HKLife provides products and services in clinical, veterinary and food testing utilizing PCR, real-time PCR and NASBA diagnostic platforms. Our core technologies include the lab-on-a-chip (<i>EFADchip</i>) technology and NASBA-POC which would be expected to revolutionize modern diagnosis and point-of-care technologies.</p>		
Market Potentials	<p>Diagnostics market: US\$39 Billion worldwide. Veterinary diagnostics: US\$1 Billion worldwide. Food safety: US\$2.8 Billion (US only).</p>		

<p>Company Core Competence or Competitive Advantage</p>	<p>HKLIFE has been quick and accurate to respond during the recent outbreaks of avian influenza (AI), foot-and-mouth disease (FMD), Severe Acute Respiratory Syndrome (SARS), as well as the recent swine influenza virus (A/H1N1) and various other infectious disease outbreaks. We have also been pioneering on many of the food related testing categories, such as genetically modified organism (GMO) testing, food pathogen testing, food allergen testing, species identification, and technology transfer programs.</p> <p>Our competitive advantage in serving the international market is derived from the diverse people mix, the driving force in fulfilling the company's vision and the capability to effectively integrate research into business culture. HKLIFE is proud of its world class team of scientists, engineers, technologists and high-caliber talented individuals, having multi-cultural experience in research, development, and productionization.</p>
<p>Partnering Objectives</p>	<p>To identify potential collaborators and partners for our subsidiary companies.</p>
